Figure 2. Flow Chart of the Website Interface for Managers

Web's Home Page:

There are two login ways in our website which include member login and coach login and some of information which is about the gym news(Promotion), while we login in a member account, it will transfer to customer page, and if we login as a coach account, it will go to management page.
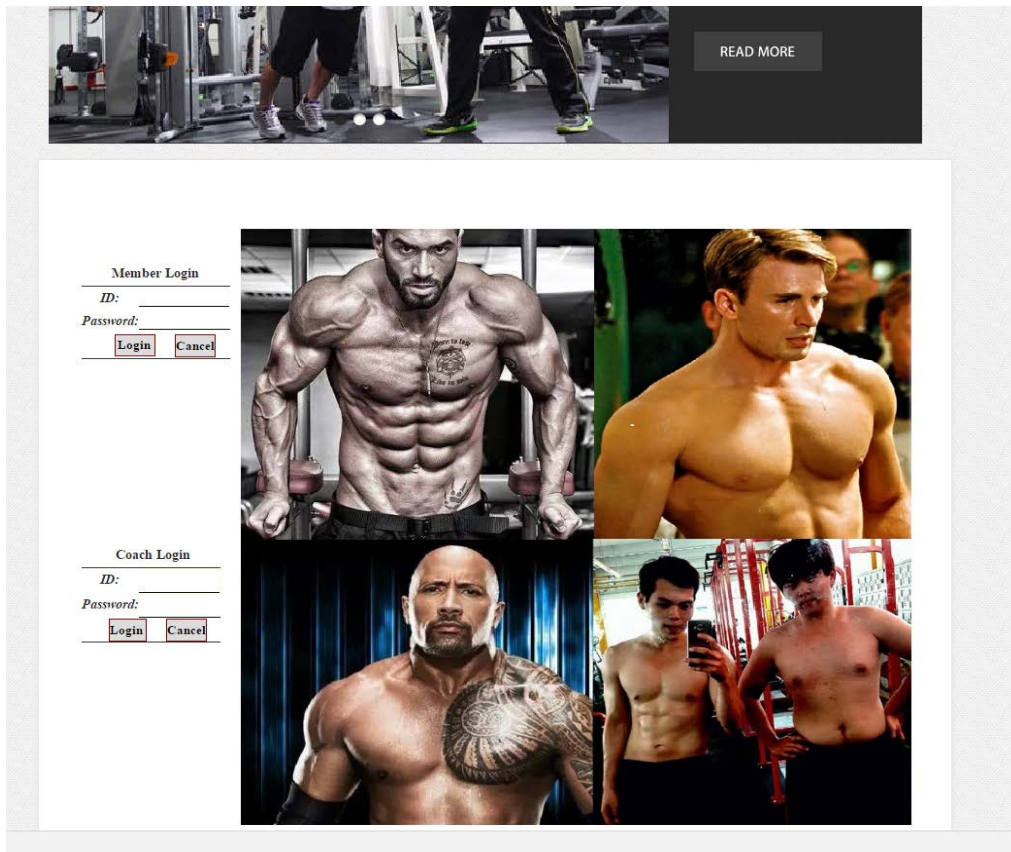

Figure3. The Photo of Web's Home Page

When we login as a member account, we can see these pages:

1. Coach Team

   In this page, we introduce the basic information of the coaches in the gym, such as phone number, price, name, email, etc.

Figure4. The Photo of Coach Team

2. Product List Page

There are many products in our online store, and there show the discount activity, inventory, price, etc. to customer. There are few gyms doing online marketing in Taiwan, so we tried to make a new trend of living in a healthy way.

Welcome to the GYM shop

Photo	ProductID	ProductName	Price	Inventory	
	P0001	Proteinpowder(bsn)	200	21	Add to shopping car
	P0002	FitnessGloves	300	21	Add to shopping car
	P0003	Proteinpowder(whey)	1500	19	Add to shopping car
	P0004	Waistbelt	2200	21	Add to shopping car
	P0005	Proteinpowder(eas)	2000	16	Add to shopping car

	P0007	Creatine	1500	15	Add to shopping car

Send   Cancel

Figure5. The Page of Product List

3. Shopping Cart Page

   Before the customer make the purchase, they always need to check the things they chose were correct or not, so they need the shopping cart page to make sure the shopping list are correct and not to make a wrong purchase.

Figure6. The Page of Shopping Cart

4. Invoice System Page

   After they paid the bill, the customer need to preserve an invoice which can protect their rights. And this invoice including many purchase info such as order name, order ID, total price, phone, email, address, etc.
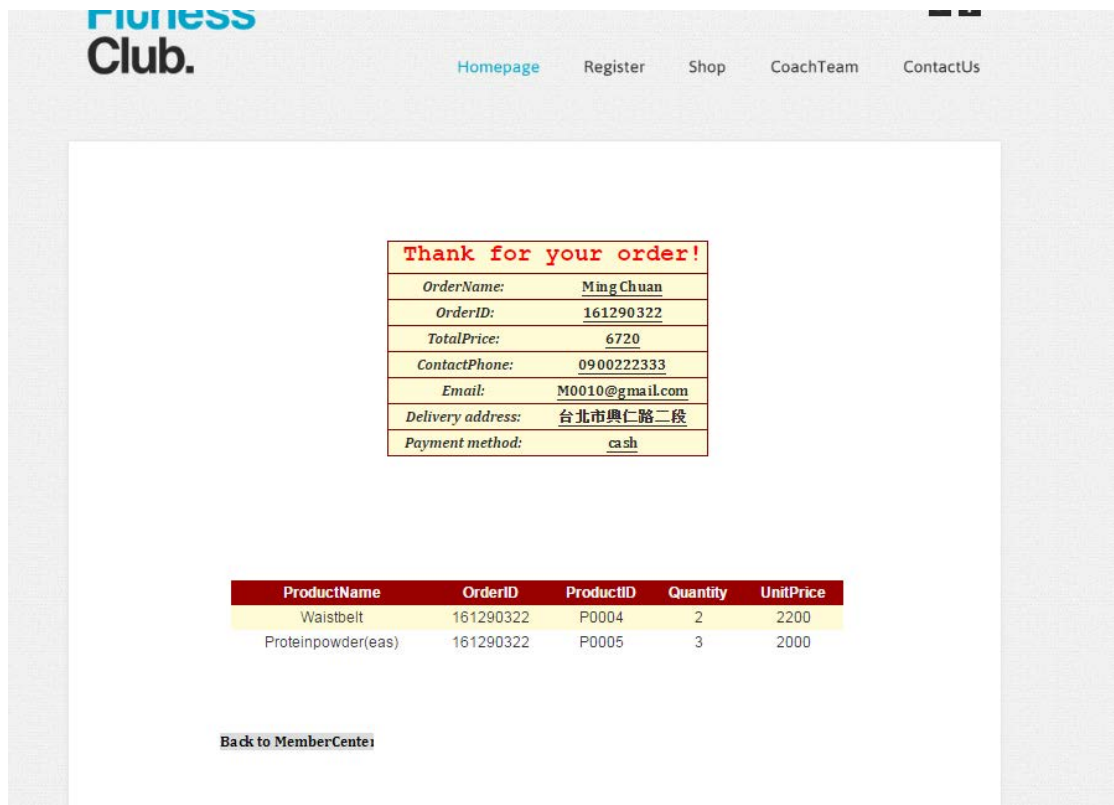

Figure7. The Page of Invoice System

5.   ContactUs page

In this page, member can see the Google map site, phone, email,etc. which are some of gym contact information. And the member can still send some messages to coach.
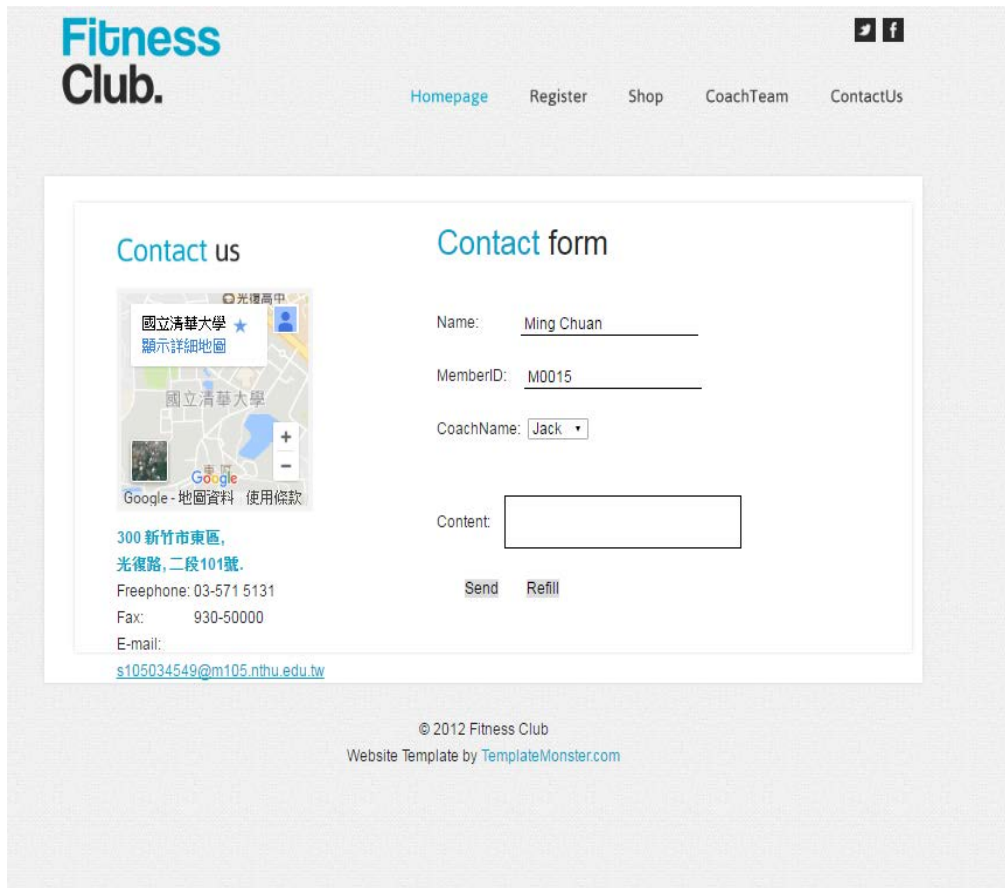

Figure8. The Page of ContactUs

6. Registration Page

    When the customer still was non-member, they can go to this page to fill information and register. Then, they can go to homepage to log in.
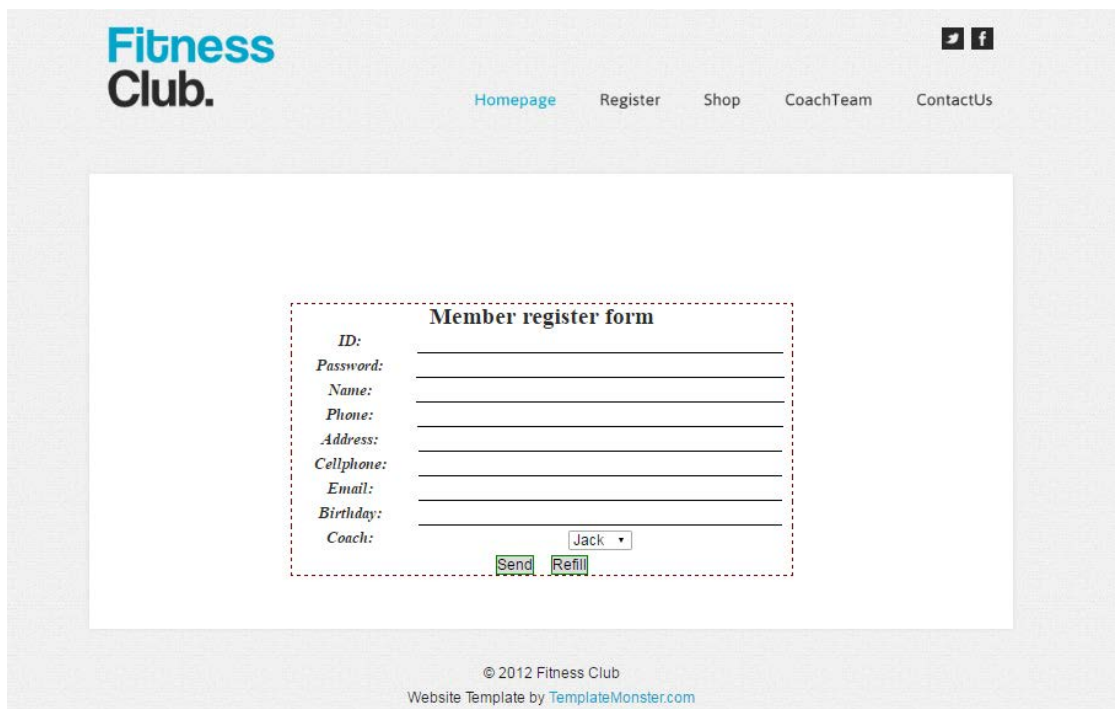

Figure9. The Page of Register

When we login as a coach account, we can see these pages:
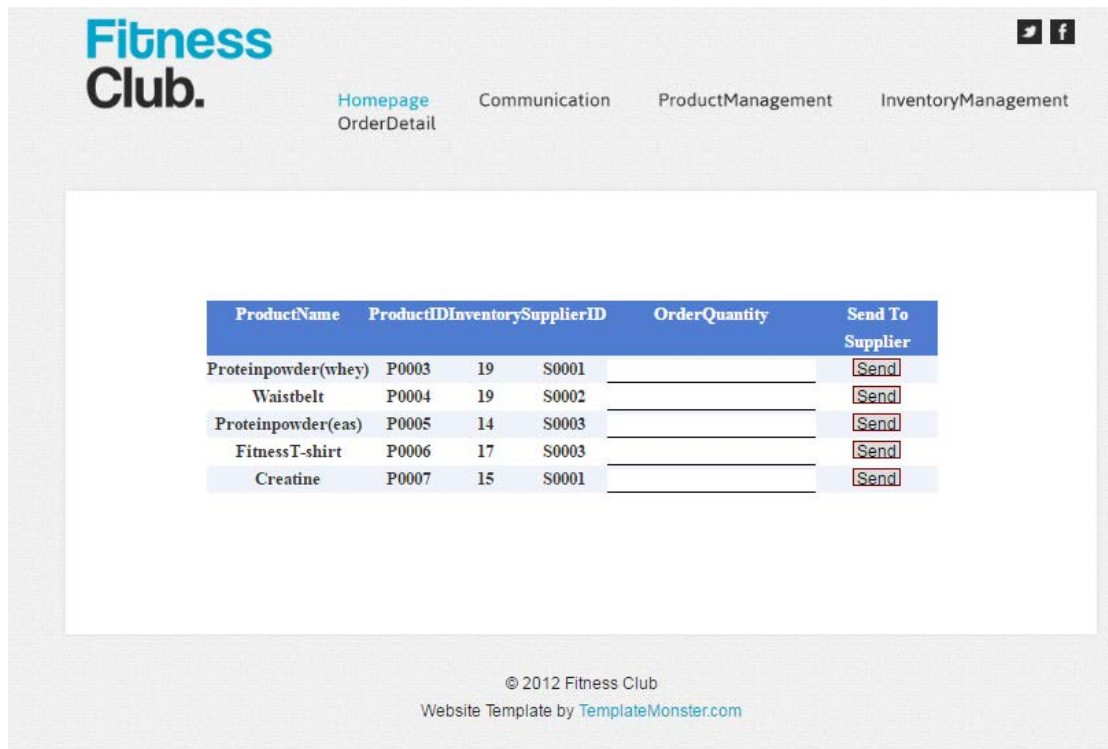

1. Communicate Page

   When the management person login the web, we can see totally different with the customer account. First, we can see the list of member and content with them easily, which can depend on phone, email, address, massage, etc. And can send the message to member. That will more convenient to communication with each other.
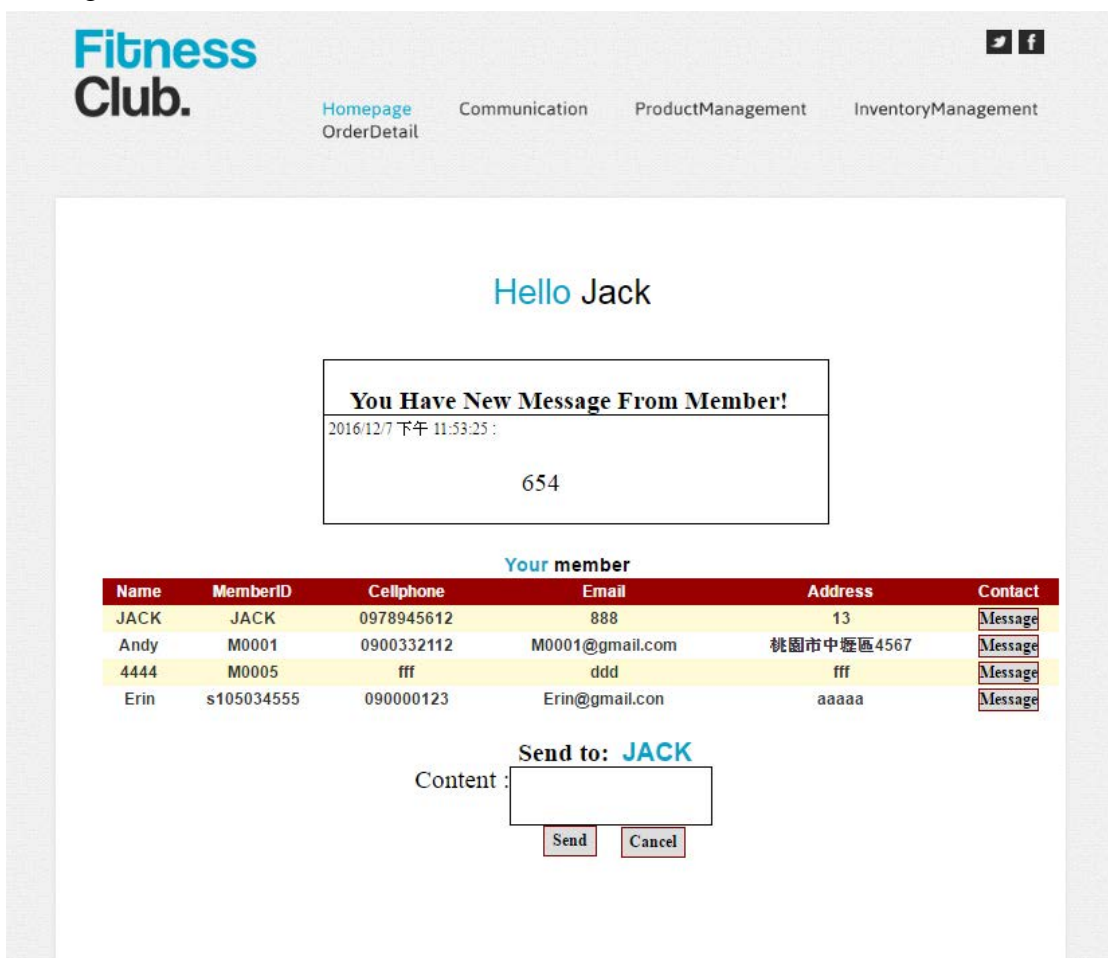

2. Contact Supplier Page

   This page provides the management people purchase the product to replenishment the inventory. We can see many information such as inventory, supplier, product,

etc. With these info, we can decide when we need to order the product and make the purchase.

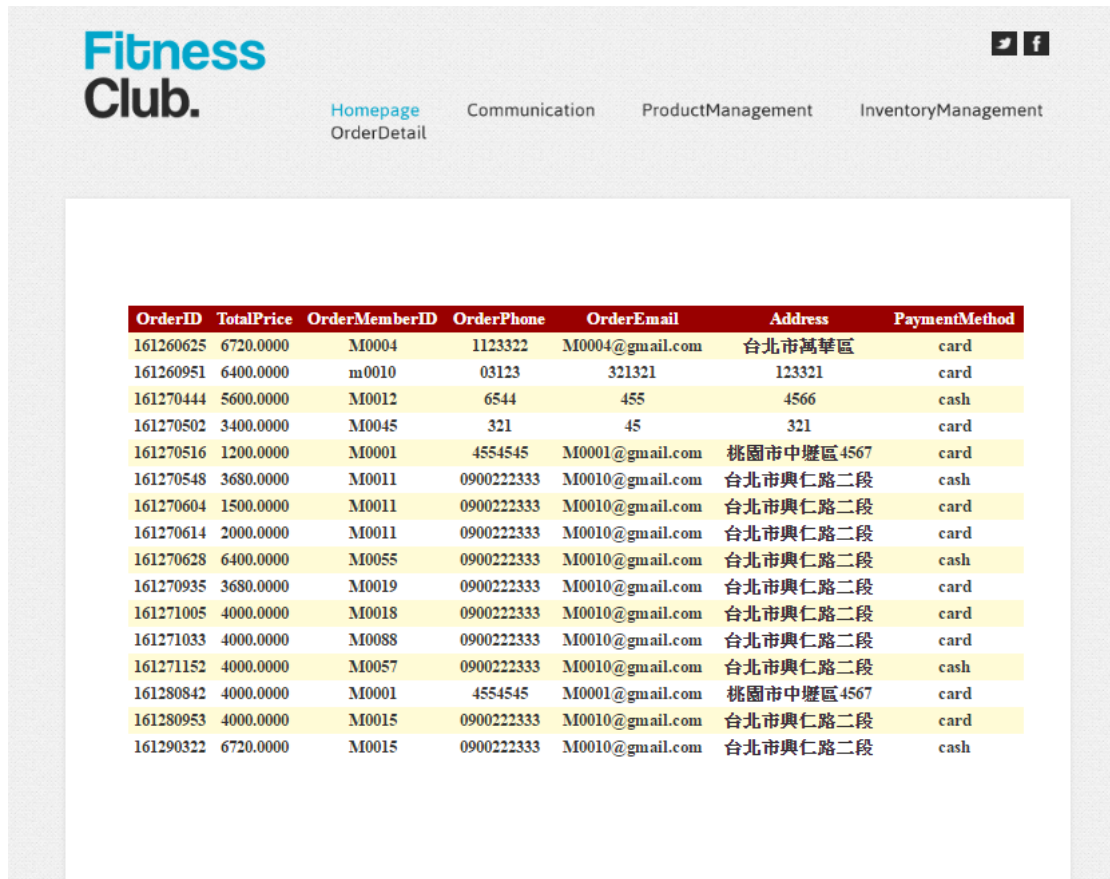

ProductName	ProductID	Inventory	SupplierID	OrderQuantity	Send To Supplier
Proteinpowder(whey)	P0003	19	S0001		[Send]
Waistbelt	P0004	19	S0002		[Send]

As Is Model:
Drill down of Orderhandling

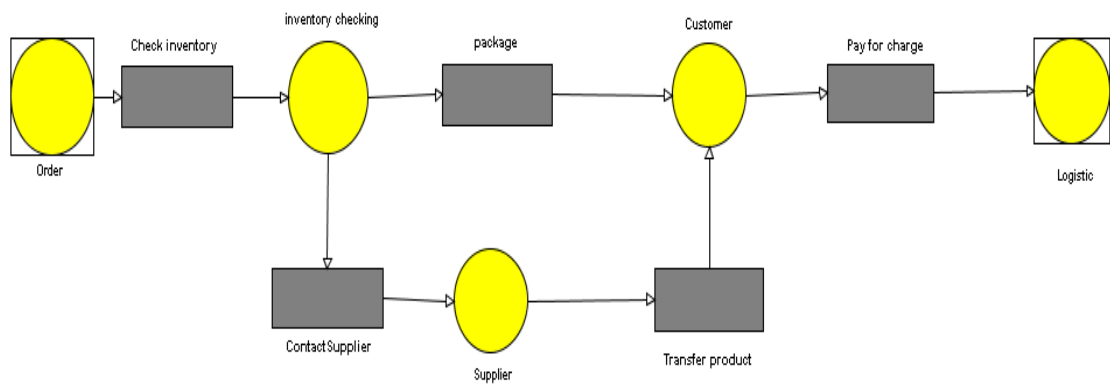

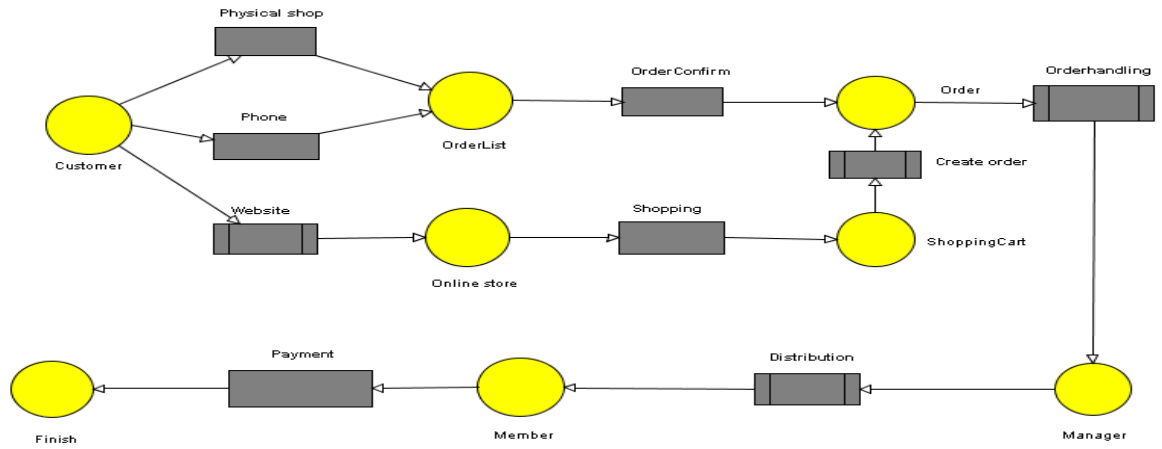

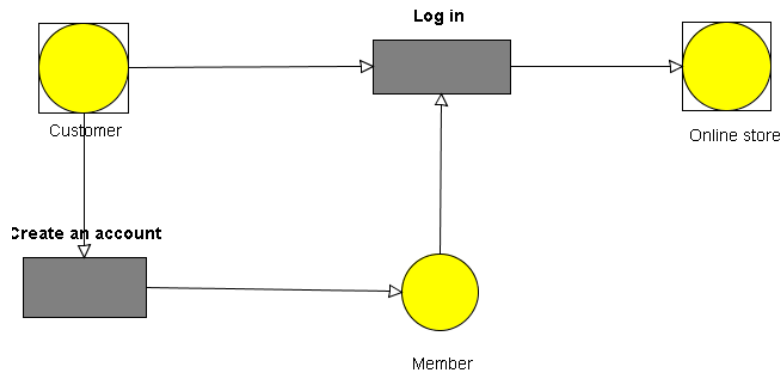

Drill down of distribution

In this model, there are two ways to make purchase which were physical shop and phone order. After the customer finish the order, the company will check the inventory are enough or not, if the inventory were enough, they will package the product to

customer after they confirm the payment; and if the inventory isn't enough, the company will purchase the product from the supplier. After all step is finished, the logistic will transfer the product to the customer on their designate way.
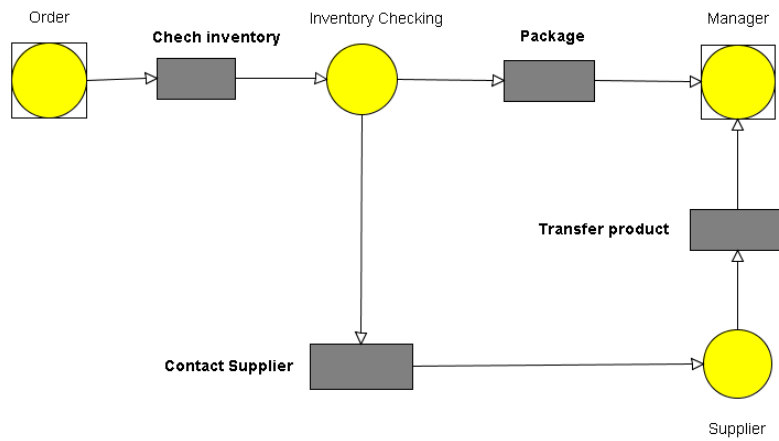

To Be Model:

Drill down of website

Drill down of Order handling

Drill down of Create Order

Drill down of choose PaymentMethod

Payment by cash

Shopiing list

Payment by credit card

Order

Drill down of distribution

Delivery to shop

Shop to shop

Finish

Manager

Delivery to home
● ER-model.

In website, we need member list and coach list to login in. And there is aa function to make coach and member communicate to each other, so we have a table "content". In order management, every order has its order details, it can show what product is ordered in each order. And product table connects to supplier table to know what supplier to call when the product in low stock level

In the future, we add a new channel to provide customer a new way to make purchase. This new channel is called the website, if the customer didn't have account, they need to register first, when they can login then they can go to the online store. Otherwise, the gym will check the inventory after they confirm the order, they will package the product to customer after they confirm the payment; and if the inventory isn't enough, the company will purchase the product from the supplier. After everything is done, the logistic will transfer the product to the customer on their designate way, and in this new way, customer can choose their payment which include credit card, cash, etc.

Activities	Count	Execution Costs (1)	Resource Costs (1)	Value Added (1)	Times (Hours)
Physical shop	5	375	0	0	2.5
Phone	15	300	0	0	2.5
Order confirm	20	40	0	0	0.333
